PROJECTS

Food Munch — Responsive Food Discovery Website | *Personal Project* | 2023

- Designed a fully responsive food discovery website using HTML5 semantic elements and Bootstrap 4 components to ensure seamless cross-device user experience.
- Integrated embedded product videos with interactive UI controls, improving user engagement and content accessibility.
- Applied user-centric design principles to organize food categories and item listings for intuitive navigation.

Todos Application — Task Management Web App | *Personal Project* | 2023

- Built a persistent CRUD todo application using vanilla JavaScript, enabling users to create, read, update, and delete tasks with real-time UI updates via DOM manipulation.
- Implemented Local Storage to persist task state across page reloads, ensuring data continuity without a backend.
- Styled the interface using CSS and Bootstrap; leveraged JavaScript Arrays and Objects for efficient task state management.

Wikipedia Search Application — Custom Search Interface | *Personal Project* | 2023

- Developed a custom Wikipedia search tool using asynchronous Fetch API (GET requests) to retrieve and display relevant articles in real time.
- Built a clean, modern UI with HTML, CSS, and Bootstrap featuring responsive design and the ability to open results in a new tab.
- Streamlined information discovery by presenting search results in structured HTML list elements with consistent styling.
